ABOUT ME

People turn to me for out-of-the-box solutions and innovative approaches.

Gaming and crafting unique game experiences are my greatest passions. I'm especially drawn to games with solid mechanics and killer level design. Over the past few years, I've played several games that have profoundly influenced my work:

- Tinykin (Level Design)
- Nobody Saves the World (Combat Design)
- Return of Obra Dinn (Content Design)
- Inscryption (Content Design)

When I'm not developing games, I'm studying how to create them; and when I'm not studying, I'm immersing myself in playing them.

I've been creating games since 2018 and have about 4 years as a professional designer and producer.
